## SUMMARY

Experienced software engineer with a passion for solving complex problems efficiently. Seeking a remote position to contribute to an innovative team focused on quality and growth.

## EXPERIENCE

### Full Stack Developer

@ALERTMEDIA

React Node.js AWS OpenAI Terraform

- Developed web applications for internal use by engineering and management teams
- Automated common tasks and improved developer onboarding with CLI tools
- Streamlined Docker Compose configurations for enhanced service management
- Created Slack integrations for user group management and on-call rotations
- Refactored legacy code and optimized CI/CD pipeline, reducing runtime from over an hour to 7 minutes

2022

Present

### Full Stack Developer

@CHILI PIPER

React Node.js Go Kubernetes

- Built customer-facing tools and add-ons to enhance Chili Piper's features
- Simplified onboarding with documentation and automation scripts
- Developed tools for the Customer Success team, reducing response times and improving satisfaction
- Created an internal support portal for consolidated data access
- Managed a Kubernetes cluster with internal services and tools

2021

2022

### Customer Support Specialist

@MIXER.COM

JavaScript Python

- Designed custom tools and scripts for streamlined workflows
- Authored troubleshooting documentation for hardware and software issues
- Handled highly confidential information
