## SUMMARY

Highly motivated and experienced software engineer seeking a remote position to leverage my skills in solving complex problems with simple, efficient solutions. Passionate about contributing to a team that values innovation, quality, and growth.

## EXPERIENCE

### Full Stack

[React](#) [Node](#) [Terraform](#)[@ALERTMEDIA](#)

- Developed multiple web applications for internal use by engineering and management teams
- Built multiple CLI tools to automate common tasks for the engineering team and improve developer onboarding experience
- Simplified Docker Compose configurations, designing a clear framework for maintaining and adding new services
- Refactored legacy code, improved pipeline run time from over an hour to 7 minutes

2022

Present

### Full Stack

[React](#) [Node](#) [Go](#) [Kubernetes](#)[@CHILI PIPER](#)

- Built popular customer-facing tools and add-ons to expand the feature set of Chili Piper
- Wrote extensive documentation and "magic" scripts to simplify the onboarding process for new customers
- Developed industry leading tools for our Customer Success team, reducing response times and increasing customer satisfaction
- Made an internal support portal aggregating data from multiple sources to provide a single source of truth for our Customer Success team
- Maintained a Kubernetes cluster with all internal services and tools

2021

2022

### Customer Support

[JavaScript](#) [Python](#)[@MIXER.COM](#)

- Designed custom tools and scripts to allow more organized workflows
- Wrote documentation on routines for efficient troubleshooting of hardware and software issues
- Handled highly confidential information

## SKILLS

- Go
- Python
- TypeScript

- Node, Deno
- Express, Fiber
- React, Svelte, HTMX

- Helm, Terraform
- Docker, Kubernetes
- AWS, GCP, DigitalOcean
- CircleCI, BitBucket, GitHub

## PROJECTS

### Feedlr

[Go](#) [HTMX/templ](#)[@CUFEE](#)

Feedlr.app offers a refreshing open-source solution for managing your YouTube subscriptions. This free platform is designed to provide an uninterrupted viewing experience, completely free from distracting elements and bothersome advertisements.

### Pulley

[TypeScript](#) [Deno](#)[@CUFEE](#)

A user-friendly CLI tool for pulling and configuring multiple git repositories blazingly fast.

### Aftermath

[Go](#) [Kubernetes](#)[@CUFEE](#)

Highly rated Discord Bot used by over 4000 servers. It provides a better in-game progress tracking for World Of Tanks Blitz with a beautiful UI rendered as an image.

### OpenMemoryDB

[Go](#)[@CUFEE](#)

A lightweight in-memory key-value database with support for persistence and a CRUD API wrapper using Go Fiber.
